1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 10 through 16 and 18 through 22 are rejected under 35 U.S.C. 102(e) as being anticipated by Teo et al.

The applied reference has a common assignee with the instant application.

Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention “by another,” or by an appropriate showing under 37 CFR 1.131.

Note the movable pad 203,205 is movable to a first position in which the pad impedes a leading edge of sheets fed from the stack. Teo et al also includes a pair of stationary pads 106 (opposite elements 101 of the feed roller assembly). See Figure 2. Note further the movable pad 203,205 is biased toward the first position (see column 5 lines 55-64).

3. Claims 17, 24 and 25 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3653

4. Claims 1 through 6 and 23 are allowed.
5. Applicant's arguments filed 22 December 2005 have been fully considered but they are not persuasive. The manner in which Teo et al applies to the limitations of claims 10 through 16 and 18 through 22 is set forth in the above rejection.
6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to David H. Bollinger whose telephone number is 571-272-6935. The examiner can normally be reached on Monday through Friday from 9:00 am to 5:00 pm.
